

Announcing our Forever White Smile Program

We feel that our patients should have the best and the brightest smiles in Annapolis. Because of this we are announcing a new additional benefit to our whitening programs.

Currently we offer two Professional Whitening Systems: Tray Whitening & Accelerated ZOOM. There are also touch up kits that available to spruce up your smile if you have already have had custom trays fabricated.

After your initial professional whitening procedure or purchase of a touch up kit, as long as you are an active patient of record in good standing and have consecutively maintained your recommended recare visits, you will receive a complimentary single dose touch up syringe of whitening solution at your second recare visit each year.

Fabrication of new appliances, if required, will be an additional fee. This will help you insure that your smile will be the best it can be forever.

This program is retro active if you have maintained consecutive dental prophylaxis twice a year since your initial investment in professional whitening or a touch up kit.

Visit www.AnnapolisSmiles.com to learn more.

Sincerely,

Scott Finlay, DDS, FAGD, FAACD
